

## MOST COMMON TYPES OF CARDIOVASCULAR SYMPTOMS

### Coronary Artery Disease

Coronary artery disease can range from no symptoms, to chest pain, to a heart attack

### High Blood Pressure

High blood pressure often has no symptoms. Over time, if untreated, it can cause health conditions, such as heart disease and stroke.

### Cardiac Arrest

The main symptom is loss of consciousness and unresponsiveness.

### Congestive Heart Failure

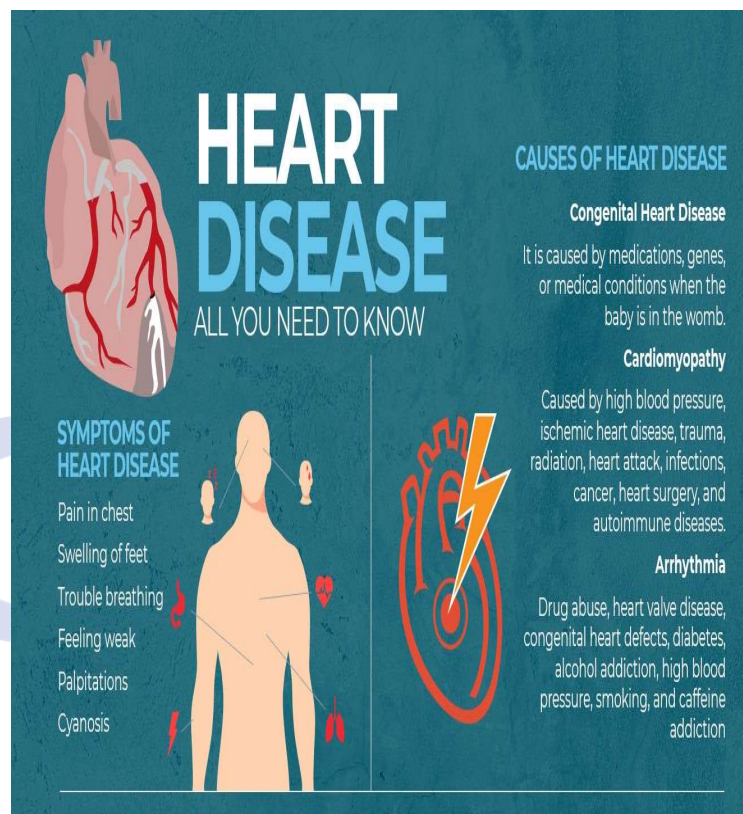

Symptoms include shortness of breath, fatigue, swollen legs and rapid heartbeat.

### Arrhythmia

There may be no symptoms. Alternatively, symptoms may include a fluttering in the chest, chest pain, fainting or dizziness

### Peripheral Artery Disease

Symptoms may include leg pain, particularly when walking.

### Stroke

Symptoms of stroke include trouble walking, speaking and understanding, as well as paralysis or numbness of the face, arm or leg.

### Congenital Heart Disease

Symptoms include abnormal heart rhythms, blue-tinted skin, shortness of breath, failure to feed or develop normally, and swollen body tissue.

## THE MENTIONED SYMPTOMS OF HEART DISEASE ARE DEFINED AS A HEALTH AWARENESS
